Air Conditioning

Wind Generator

Solar Panels

Complete Engine Replacements

Starters

Max Prop

As a US certified International Freight Forwarder, ZRD is able to ship you our products Directly —

Worldwide.

MAKING ELECTRIC POWER PLENTIFUL

ZRD DC GENSETS

are without question or compromise the best DC Gensets. The complete line provides many choices of voltage (12, 24, 32/37, 48/56 vdc) and amperage (100 - 800 amps) output combinations. 120, 208, & 240vac are also available via an inverter.

Some models offer external regulation. All come standard with a User Controllable Throttle that **significantly Saves Fuel and Reduces Noise!**

6,000% More NET OUTPUT

may be possible when compared to some 120vac solutions. ZRD designs **Run considerably Cooler and Reduce engine Run Time** due to inherently **Higher Efficiencies!**

Low profiles allow installations into most vessels —especially catamarans. Like everything ZRD designs and manufactures, they are the "Rolls Royce" of the industry, at surprisingly **affordable pricing.**

High Output Alternators

Brackets, PTOs (Power Take Offs), Pulleys, & Adjustment Arms.

ZRD should be the first place you contact for answers, design requirements, and components.
